

MULTIFABS

WATER SUPPLY PROJECTS/URBAN PLANNING/IOT/SMART

Multifabs Provides the best solutions for adopting different modes of Water Supply conveyance(Usage of materials for pipes (MS/DI/HDPE) and adaptation of Conservation methodologies as well(RW harvesting,STP Water etc). Multifabs adopts the best methodologies in terms of the best mechanical engineering concepts (Mechanical Joints/effective designs of pipeline) and also works on solutions for water tracking/Billing via electronic Meters with data loggers and Server based technologies (IoT). Multifabs also works on Water supply works related to Urban Development.
